## EDUCATION

Bachelor of Science in  
Civil Engineering

**Sylhet Engineering College**

📅 2017 - 2022

## SKILLS

- HTML
- CSS
- TailwindCSS
- Bootstrap
- JavaScript | ES6
- PHP
- Laravel
- React.js
- Node.js | Express.js
- Firebase Authentication
- NoSQL Database (MongoDB, Mongoose)
- MySQL Database

## CAREER OBJECTIVE

Improving my skills in web development so that I can continue this as my profession. I am very new here, just started with HTML four-five months ago. Now I know a bit about JavaScript, React, NodeJS, PHP, Laravel. I am also exploring the core concepts of computer science like Data Structures, Algorithms, OOP, DBMS. If I get opportunity and proper guidance, hopefully I will soon be fit for professional work.

## PROJECTS

### Memory Sharing Website

Create a memory sharing website, where you can share your memory with other and like on others memory and edit and delete your own memory.

In frontend, I used,

- React
- React-router-dom
- Redux
- React-hook-form
- React-file-base64
- Tailwind
- Daisyui
- Firebase
- Moment
- Axios

In backend, I used

- Express
- Cors
- Mongoose
- Body-parser
- Dotenv
- Nodemon
- Bcryptjs
- Jsonwebtoken

🌐 **Website Link:** <https://my-memory-project-1.web.app>

🐙 **Front End:** <https://github.com/MDMinhazulIslamKhan/memory-project-client>

🐙 **Back End:** <https://github.com/MDMinhazulIslamKhan/memory-project-server>

### Ecommerce Website

An e-commerce website where you can order your favorite product and received product by cash on delivery.

Here I used,

- Laratrust
- Laravel
